DIGITAL HOSPITALITY MARKETING

Digital Restaurant Marketing

AI restaurant websites and marketing that fill tables, win reservations and turn first-time guests into regulars.

No long-term contracts. Free marketing audit.

digitalhospitalitymarketing.com

AI Restaurant Website Builder

Attract hungry customers and more online orders with an AI-powered restaurant website that also handles your SEO, blog and social posts. Ready in about 30 minutes, at a fraction of the cost of a digital agency.

Everything Your Restaurant Needs in One Platform

- ✓Professional, modern online presence
- ✓Mobile-responsive design
- ✓SEO for "restaurants near me" searches
- ✓Online table reservations, 24/7
- ✓Online ordering integration, pickup and delivery
- ✓Digital menu displays with photos and dietary info
- ✓Reviews and testimonials display
- ✓Custom branding: your colors, logo and voice
- ✓Click-to-call and maps
- ✓Analytics and insights
- ✓Fast, secure and reliable: SSL, backups, hosting
- ✓Launch in minutes, no credit card to start

How It Works

1. Tell us
Your name, location, menu, hours, photos and branding.

2. AI builds
Structure, content and design built around your restaurant.

3. Optimize
Local SEO, metadata, headings and technical setup.

4. Connect
Social media, blog posts and customer inquiries.

5. Launch
Keep improving your site and visibility over time.

Built for Direct Orders and Local Search

Restaurant website design and redesign

Menu-first layouts built around food photography, location and reviews. Redesigns keep the URLs, copy and photos that already perform, with faster mobile pages.

Restaurant website SEO

Technical SEO, Core Web Vitals, titles and meta descriptions, internal linking, image alt text, local SEO and structured data.

Reservations and ordering

Reservation and ordering calls to action, dedicated menu pages, click-to-call and inquiry forms with every lead texted to you instantly.

AI marketing automation

Automated blog posts, service, location and comparison pages, Instagram and Facebook posting, competitor research and analytics.

Restaurant Marketing That Fills Tables and Builds Guest Loyalty

Diners decide where to eat long before they walk in the door. We build marketing strategy that raises your visibility, wins the reservation and turns first-time guests into regulars, with SEO, reputation management and social campaigns tuned for the dining industry.

Restaurant SEO and Local Search

Organic visibility built around "near me" and menu-driven searches, tuned to capture diners choosing where to eat tonight.

Reservation and Guest Marketing

Email, SMS and app-driven campaigns that fill slow shifts, promote specials and turn one visit into a repeat guest.

Reputation and Review Management

Proactive review generation and response across Google, Yelp and delivery platforms.

Paid Media and Remarketing

Google, Meta and delivery-app campaigns that convert menu views and promotions into confirmed reservations.

Brand and Visual Storytelling

Photography direction, brand identity and content that showcases your dishes, dining room and chef.

Social Media and Content

Instagram, TikTok and Facebook content built around menu highlights, events and behind-the-scenes moments.

Turn One Reservation Into a Lifetime Regular

Third-party delivery and reservation apps bring reach, but they say nothing about your chef's story, your specials or your loyalty perks. We keep your restaurant visible where diners already search, while building a direct engagement channel you own instead of renting. The result is a healthier mix of new and repeat guests and a stronger average check.

- ✓Optimized for the full discover-to-reservation journey
- ✓Built to showcase your menu, ambiance and chef's story
- ✓Review and reputation strategy tuned for dining
